ABOUT

Innovative Software Engineering Student with a proven ability to design and deliver full-stack solutions that blend technical precision with user-centric creativity. Proficient in leveraging cutting-edge technologies, including Java, PHP, JavaScript, React JS, Node.js, Express.js, MongoDB, and PostgreSQL to build scalable, high-performance applications. Passionate about solving complex problems, driving innovation, and delivering impactful software solutions that exceed expectations. A motivated team player and quick learner, ready to contribute to a forward-thinking organization and thrive in dynamic, challenging environments.

EDUCATION

FAST National University of Computer and Emerging Sciences Karachi, Pakistan
Bachelor of Science in Software Engineering Expected 2025

EXPERIENCE

SYSARTX Karachi, Pakistan
Full Stack Developer Intern July 2024 – September 2024

- Developed web applications using **React JS**, **Node.js**, and **Express.js**, implementing dynamic and responsive user interfaces.
- Designed and integrated RESTful APIs, ensuring seamless back-and-front communication.
- Worked on database management using **MySQL** and **Sequelize ORM**, ensuring data integrity and optimization.
- Improved user experience by implementing UI components with **Chakra UI**.

PROJECTS

Freelancer Hiring Platform | *React JS, Node.js, Express.js, Sequelize, Tailwind CSS* May 2024 – July 2024

- Built a platform enabling freelancer registration, automated skill-based recommendations, and job matching.
- Integrated features for hiring models (hourly or fixed), work logs, task statuses, and client interview management.
- Developed a responsive UI using **React JS** and **Tailwind CSS**, and managed backend logic with **Node.js**, **Express.js** and **Sequelize ORM**.

Learn Link (LMS) | *PHP, jQuery, AJAX, MySQLi* March 2024 – April 2024

- Developed a comprehensive Learning Management System that provides role-based access for students, teachers, and admins. Implemented features for managing attendance, grades, and user details, enhancing the efficiency of educational administration.

University Management System | *JavaFX, MySQL* September 2023 – November 2023

- Developed a robust university management system with features such as course management, grading, course registration, academic progress tracking, and fee management. Using JavaFX for a dynamic user interface and MySQL for database management.

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript, PHP, SQL, HTML, CSS
Frontend Technologies: React JS, Bootstrap, Tailwind CSS, Chakra UI, JQuery, Ajax
Backend Technologies: Node.js, Express.js, Laravel, Sequelize
Databases: MySQL, MongoDB, PostgreSQL
Version Control Tools: Git, GitHub
Soft Skills: Detail-Oriented, Effective Communicator, Problem Solver, Team Player

CERTIFICATIONS

Modern JavaScript: ES6 Basics, Coursera, 2024
Beginner's Guide to GitHub, Alison, 2022
CSS Complete Course for Beginners, Udemy, 2023
HTML5 Mastery Course, Udemy, 2023
